## **DETAILED ACTION**

### ***Priority***

This application is a divisional of US 09/913106 .

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3,5, 8,9, 11, 16,22,23, 28 and 29 , drawn to compounds of formula I and a process of making them , classified in class 544 , 514 subclass , 360, 111; 253.01 , 231.5.
- II. Claims 30-34 , drawn to different process of making the compounds , classified in class 544, 546, and in various subclasses.
- III. Claims 35-39 , drawn to different processes of using the compounds of a different scope, classified in class 544, 546, 514 and various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I,II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a different core and scope of the compounds.

The compounds made in group II and the use of the compounds as given in group III have a different scope .

One process of making as given in claim 16 has been included in the group I.

Art Unit: 1625

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III , restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Dupont on 8/11/04 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-3,5, 8,9, 11, 16,22,23, 28 and 29 , drawn to compounds of formula I and a process of making them , classified in class 544 , 514 subclass , 360, 111; 253.01 , 231.5.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 30-34, 36-39 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants preserve their right to file a divisional on the cancelled non-elected claims , without prejudice in due course.

Art Unit: 1625

If applicant 's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art , the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites O-protecting group and functional derivative and it is not clear what these functional derivatives and the groups are.

Applicants can overcome this by inserting the ones described in the specifications on page 14 and 15 .

### ***Conclusion***

The claim 16 is are not allowable.

US 10/805733 is not a Double patenting since the X of the instant application is R2-N< wherein R2 is an amido group and prior art has an aromatic ring.
